***PAVAN Construction Co.***

**400 Residential Units -  
Sanandaj**

PAVAN construction co.

**400 Residential Units - Sanandaj**

**(1997-1998)**

*PAVAN Construction Co.*

This project was built in the mountain zone and located in south of Sanandaj city and the Area is about 30156 square meter. All the process including all design phases ( architectural , structure , instalation) and implementation works was done by this company . This complex included 400 Residential units in pour separate block and different Area included : (37 , 45-48 , 53 , 65 , 72 ) square meter.

The structure system that is used in this Complex is concrete frame with light ceiling materials. Heating system is heater and the Air condition system is water cooler .

Mentionable that the total Area of this complex is about 28000 square meter .

Major operation activities are :

1- Excavation	43,235	Cub.m
2- Embankment	26,300	Cub.m
3- Concrete Work	11,266	Cub.m
4- Bar Work	750	Ton
5-Light Steel Work	25	Ton
6- Cast Iron Pipe	16,266	M.L
7- Steel Pipe	25,666	M.L

## Abas Abad's Interchange Bridges - Tehran

### *PAVAN Construction Co.*

Constructing the Interchange Bridges No .2 , 3 and retaining walls zone No . 4 - Abas Abad field .

Major operation activities are :

1- Excavation	97,648	Cub.m
2- Embankment	3,955	Cub.m
3- Form Work	19,786	Sq.m
4- Bar Work	1,380	Ton
5-Heavy Steel Work	72	Ton
6- Concrete Work	12,434	Cub.m

***PAVAN Construction Co.***

***Cultural Complex - Sanandaj***

PAVAN construction co.

## Cultural Complex - Sanandaj

(2000-2003)

*PAVAN Construction Co.*

Including :Construction of cultrual complex in sanandaj city. Type of structure is consist of concrete frame with light ceiling. Total area is about 12000 square meter that included in to amphitheater , gathering hall , library and landscaping , also providing all the equipments and installations. This cultrual complex is the largest and one of the most complete in the west zone of the country.

Major operation activities are :

1- Excavation	13,482	Cub.m
2- Concrete Work	6,183	Cub.m
3- Bar Work	430	Ton
4-Heavy Steel Work	452	Ton
5-Light Steel Work	71	Ton
6-Stone wall	12,000	Cub.m
7- Cast Iron Pipe	2,500	M.L
8- Steel Pipe	6,500	M.L

**Excavation and Supporting Structure - Station V2 -Tehran Metro(2002-2004)**

## Excavation and Supporting Structure- Station V2- Tehran Metro

### ***PAVAN Construction Co.***

Including : 119 concrete piles excavation(Dia. : 1 meter ave. depth : 27 meter) in order to support the temporary steel deck . Construction and installation of 55 steel deck ( ave. length : 20 meter - ave. width : 2.5 meter - ave. weight : 20 ton )  
Construction and installation of concrete piles struts in 4 levels (ave. weight : 800 ton)  
- Excavation under the installed steel deck.

Major operation activities are :

1- Excavation-open area	12,000	Cub.m
2- Excavation-closed area	35,000	Cub.m
3- Pile excavation	4,000	M.L
4- Bar Work	380	Ton
5- Concrete	6,320	Cub.m
6-Heavy Steel Work	1,500	Ton
7-Asphalt	15,092	Sq.m

Factory - Metro south  
Terminal - Tehran***

PAVAN construction co.

### Wagon Manufacturing Factory - Metro South Terminal - Tehran (2004-2007)

## Wagon Manufacturing Factory - Metro South Terminal - Tehran

### ***PAVAN Construction Co.***

Including :Construction of six buildings of the wagon manufacturing factory -Fath Abad- Tehran.

The project is located in front of the FathAbad refinery- Qom Road- Azadegan highway

The buildings details are mentioned below:

1- Building no.1-(wagon montage site)-includes two parts -First part :main site for manufacturing two storey and typical wagon - Second Part : administrative building -Total area is about 19500 square meters .In the main site,steel trusses are used in roofing and the structure of administrative building is steel.

2- Building no.2 - (Electrical post)- contains of the two storey concrete building with a total area of 300 square meters.

3- Building no. 3- (Dormitory & Restaurant & Hospital &Prayer room)- contains of two storey concrete buliding with a total area of 1400 square meters.

4- Building no. 4- (Security room-Fire room)- contains of one storey concrete buliding with a total area of 300 square meters.

5- Buildings no. 5 & 6 are used as mechanical room.

Major operation activities are :

1- Excavation&Embankment	40,000	Cub.m
2- Form Work	15,000	Sq.m
3- Bar Work	1,200	Ton
4- Concrete	10,000	Cub.m
5- Heavy steel Work	1,700	Ton
6- light steel Work	300	Ton
7-Covering walls - sandwich pannel	10,000	Sq.m

Kamyaran***

PAVAN construction co.

### Irrigation and Drainage Network of Bilevar Field - Kamyaran (2004-2008)

## Irrigation and Drainage Network of Bilevar Field -Kamyaran

### *PAVAN Construction Co.*

Including :Implementing and construction of irrigation and drainage network of B3,B4 zones- developing area of BILEVAR field.This project was located between Kermanshah and Kordistan Provinces and was 70 Km far from Kermanshah city-west of the Kamyaran city.

Overall description:

1- Main canal	20	Km
2- Rock drainage	30	Km
3- Cement piping	13	Km
4- technical buildings of canal& drainage &pipes		

This project contains several parts : Construction of the main canal and siphons that passed rivers and roads- Pipelining- Installing valves-Implementing basins and construction of drainages and structures related to it.

Major operation activities are :

1- Excavation-in rock &soil	526,780	Cub.m
2- Excavation-Canal	204,033	Cub.m
3- Embankment	479,742	Cub.m
4- Rock fills and Masonary Walls	50,566	Cub.m
5- Form Work	44,654	Sq.m
6- Bar Work	1,040	Ton
7- Concrete work	20,657	Cub.m
8- Construction of Administrative & Residential & Back up bld.	1,200	Sq.m

**Aidoghmoosh- Water Conveyance Canal and Tunnel - MIYANEH**

**(2005-2009)**

## Aidoghmoosh - Water Conveyance Canal and Tunnel - MIYANEH

### *PAVAN Construction Co.*

Including :implementing and construction of the Aidoghmoosh irrigation and drainage network included conveyance tunnel and canal.

Project is located in Aidoghmoosh area -south of the Miyaneh city.

Detials are mentioned below:

- 1- Construction of the canal (ave. length : 6.7 Km)
- 2- Construction of one unit of tunnel ( ave. length : 2.28 Km)
- 3- Construction of two unit of tunnel ( ave. length of each one: 560 m)
- 4- Construction of the technical buildings related to canal .
- 5- Construction of the canal service roads (ave.of total length : 6.7 Km)

Major operation activities are :

1- Excavation-in rock	879,000	Cub.m
2- Excavation-Canal in rock	147,800	Cub.m
3- Tunnel drilling	73,155	Cub.m
4- Steel frames for tunnel	74	Ton
5- Form Work (canal)	69,180	Sq.m
6- Form Work (tunnel)	15,697	Sq.m
7- Bar Work	3,590	Ton
8- Concrete work (canal)	22,361	Cub.m
9- Concrete work (tunnel )	20,993	Cub.m
10- Shotcrete	80,842	Sq.m

Tohid Metro Station (E4), and tunnel of Line 4 - Tehran

(2007-2011)

## Tohid Metro Station (E4) , and the 1280 m. tunnel of Line 4 - Tehran

### *PAVAN Construction Co.*

Implementing operations in Tohid Metro Station (E4) , and the 1280 m. tunnel of Line 4:

1. Structure and guard structure of the station
2. Station's architecture
3. Station's electrical and mechanical installations
4. Tunnel ventilator (E4-D4)
5. 1280 m. Tunnel

Tohid Station has an area of 11550 square meters and includes the following items:

Ticket Hall: 5950 square meters, platform level: 440 square meters, below platform level:

1200 square meters, a unit of tunnels: 1280 meters.

Major operation activities are :

1- Station Excavation	126,000	Cub.m
2- Pile Excavation	2,534	meters
3- Tunnel Excavation	85,000	Cub.m
4- Bar Work	5,460	Ton
5- Framing	33,748	Sq.m
6- Formwork in the tunnel	30,343	Sq.m
7- Concrete	59,879	Cub.m
8- Shotcrete	68,000	Sq.m

***PAVAN Construction Co.***

Miyaneh - Bostanabad - Tabriz Railway- lot 5,from 86+996 kilometer to 106+997, is located in Eastern Azerbaijan and includes the following processes:

- 1- Earthworks,including all neccessary functions to complete the railway infrastructure.
- 2-Heidarbaba great bridge with 420 meter length including two 30 meteres spans and nine 40 meteres spans, 136 piles and 1700 tons Iron deck.
- 3- Technical buildings including bridges,culverts,walls and another technical buildings and protection works.
- 4- 230 meteres Gallery
- 5- 150 meteres Retaining walls
- 6-Special Bridge intersects with oil and gas pipes with 13 meters span and 18 piles.
- 7- Shahryar Way Station with 300 square meters area and the implementation of related facilities and landscaping

Major operation activities are :

1- Excavation	2,150,220	Cub.m
2- Embankment	750,000	Cub.m
3- Bar work	3,965	Ton
4- Form work	51,000	Sq.m

## Khoda Afarin Main Canal and Related Technical buildings

### ***PAVAN Construction Co.***

Khoda Afarin Main Canal is located in Eastern Azerbaijan. This zone of operations is a part of the border river of Aras basin area and is located in northern latitudes of the country. The main canal length is about 14.89 kilometers, and includes the following processes:

1- Main canal with a trapezoidal cross section with concrete cover (lining)	11,840 meters
2- Rectangular canal with reinforced concrete	1,540 meters
3- Culvert structure with reinforced concrete, under the main canal direction	53 sets
4- 2 set of siphons with five string steel pipes of 3000 mm. diameter	3,480 meters
5- Impoundments	10 sets
6- Car bridge structures	8 sets
7- Side spillway structure	2 sets
8- Supper passages	4 sets

Major operation activities are :

1- Excavation	4,083,515	Cub.m
2- Embankment	1,701,865	Cub.m
3- Canal digging	657,145	Cub.m
4- Form work	96,475	Sq.m
5- Bar work	5,490	Ton
6- Concrete work	296,175	Cub.m
7- 3000 mm diameter Steel pipe	3,480	M

### Ghiz Ghale' Si Dam Project

(2016 - 2022 )

This project is located in The Eastern Azarbaijan Province, and includes the following processes:

**A. Constructional works**

- 1- Embankments, Drilling and grouting in side banks.
- 2- Agricultural outlet structures and Left and right control buildings
- 3- Spillway structures and Left and right power plants
- 4- Second stage of Diversion
  - Excavation the ending of right and left outlet canals.
  - Removing dykes and implementation of intermediate dyke.
  - Construction and waterproofing of intermediate dyke.
- 5- Dam body -intermediate section.
- 6- Left and right spillway structures -final stage.
- 7- Catchment basins for Khod Afarin dam.
- 8- Supplementary works, asphalt and lighting system of crest.

**B. First stage of hydro mechanical, electrical and control instruments.**

1. Bottom tipper system.
2. Hydro mechanical instruments of power plant.
3. Diversion gate.
4. Designing, supply, production, transportation and installation of all Electricity and control elements.
5. Training of employer personnel.
6. Checking and completing the designs of frame lid of service, emergency, electricity and control

Major operation activities are :

1- Excavation	1,240,000	Cub.m
2- Shell Gravel	951,326	Cub.m
3- Rockfill	200,000	Cub.m
4- Clay	170,210	Cub.m
5- Coarse filter	87,000	Cub.m
6- Fine filter	93,800	Cub.m
7- Rip-Rap	33,000	Cub.m
8- Bar work	15,245	Ton
9- Form work	97,844	Sq.m
10- Concrete work	218,410	Cub.m

## Lot 5 and Lot 6 of Tizh Tizh - Garan Road and Baghan Tunnel (Marivan)

### **PAVAN Construction Co.**

Lot 5 and Lot 6 of Tizh Tizh - Garan Road and Baghan Tunnel Project is located in Kurdistan province. The project includes the construction of approximately 10 km paved road and 1,886m tunnel. The project consists of following lots:

1 - Km: 37+500 - 39+508

Construction of paved road with the total length of 2000 m which consists of two 3.65 m lanes, plus two 1.55 m paved shoulders and two 0.3 m unpaved shoulders.

2 - Km: 39+508 - 41+393

Construction of an approximately 1,886m tunnel, which includes two 4.65 m lanes plus two 0.6m sidewalk at the sides.

3 - Km: 41+393 - 42+200

Construction of paved road with the total length of 807 m , which consists of three 3.65-m lanes, plus two 1.55 m paved shoulders and two 0.3 m unpaved shoulders.

4 - Km: 42+200- 42+280

Construction of paved road with the total length of 80 m , which consists of three 3.65-m lanes, plus two 1.35 m paved shoulders and two 1.5 and 0.5 m unpaved shoulders.

5 - Km: 42+280- 43+702

Construction of paved road with the total length of 1422 m , which consists of three 3.65-m lanes, plus two 1.35 m paved shoulders and two 0.5 m unpaved shoulders.

6 - Km: 43+702- 49+300

Construction of paved road with the total length of 5598 m , which consists of two 3.65-m lanes, plus two 1.35 m paved shoulders and two 0.5 m unpaved shoulders.

Major operation activities are :

1- Excavation	1,371,020	Cub.m
2- Tunnel Excavation	163,125	Cub.m
3- Embankment	588,320	Cub.m
4- Form work	84,110	Sq.m
5- Concrete work	9,435	Cub.m
6- Tunnel Lining	16,410	Cub.m
7- Foundation digging	10,570	Cub.m
8- Steel Frame for Tunnel	714	Ton
9- Mesh work in Tunnel	245	Ton
10- Bar work	1,235	Ton
11- Base Course	59,965	Cub.m
12- Prime coat	147,435	Kg
13- Tack coat	131,700	Kg
14- Asphalt	1,913,955	Sq.m - cm

(2019- \_)

## Fifth Section of Khajeh-Varzaghan-Aghababa's Highway

### ***PAVAN Construction Co.***

The Fifth Section of Khajeh-Varzaghan-Aghababa's highway (from kilometer 50+200 to 61+550) is located in East Azerbaijan province. This project is approximately 11,350 meters length, with the final width of 15 meters. It includes 11 meters of asphalt roads and two gravel shoulders, each with the width of 2 meters. Subgrade construction, base, asphalt, and technical structures are as follows:

- 1-Road's earth work, subbase, base, and asphalt, including all necessary works to complete its subgrade construction and pavement
- 2-Construction of valley culverts at station 58+148, including two 6 meters' spans
- 3-Construction of Varzaghan-Kasan's rural underpass at station 55+455 including an 8 meters' span
- 4-Overpass Bridge construction on Ahar-chay link-road at station 54+980 including three 10 meters' spans
- 5-Construction of an underpass structure with the Varzaghan-GovinjehSoltan link-road at station 50+531, including an 8 meters' span

The main volumes of the project are as follows:

1- Excavation Work	1,531,000	Cub.m
2- Embankment	958,400	Cub.m
3- Form work	32,681	Sq.m
4-Concrete Pouring	22,211	Cub.m
5-Rebar Tying	783	Ton
6-Base Course	50,564	Cub.m
7-Prime Coat	106,099	Kg
8-Asphalt Binder	1,822,356	Sq.m-Cm
9-Asphalted Surface	1,512,387	Sq.m-Cm

## Subgrade construction of the Fourth Section of Ilam Province Connection to Country's Railway Network

### *PAVAN Construction Co.*

Subgrade construction of the fourth section of Ilam-West EslamAbad has the length of approximately 17 kilometers. This project is located in Kermanshah province and includes the following operations:

- 1-Earth work operations that includes all necessary steps for completing the railway's subgrade construction
- 2-Construction of Sarmast railway station located in Gowawar area with the length of 1200 meters
- 3-Construction of two major bridges with the length of 20 and 30 meters
- 4-Construction of an overpass bridge on the Sarmast city to Chikan village link road
- 5-Construction of crossing structures from the gas pipeline
- 6-Culvert construction with two spans of 5 meters' length
- 7-Construction of tunnel no.1 with the length of 400 meters and executive operations of entry and exit portals with the overall length of 180 meters
- 8-Construction of tunnel no.2 with the length of 1280 meters and executive operations of entry and exit portals with the overall length of 390 meters
- 9-Construction of tunnel no.3 with the length of 2220 meters and executive operations of entry and exit portals with the overall length of 540 meters

The main volumes of the project are as follows:

1- Excavation Work	785,425	Cub.m
2-Tunnel Excavation	206,640	Cub.m
3-Embankment	762,590	Cub.m
4-Concrete Forming	134,335	Sq.m
5-Concrete Pouring	34,215	Cub.m
6-Tunnel Lining	24,505	Cub.m
7-Tunnel Framing	288	Ton
8-Tunnel Wire Mesh Reinforcing	991	Ton
9-Rebar Tying	2,506	Ton
10-Shotcrete	1,355,300	Sq.m-Cm
11-Stone Work	6,015	Cub.m
12-Subballast	18,200	Cub.m
13-River Materials(For Embankment)	19,405	Cub.m
14-Rockfill	367,500	Cub.m

Section 4 of Khorramabad-Poldokhtar axis (Morani-Poldakhtar border) (2020 - \_)

## Section 4 of Khorramabad-Poldokhtar axis (Morani-Poldokhtar border)

### ***PAVAN Construction Co.***

Khorramabad-Poldokhtar road as part of Ahvaz-Khorramabad transit axis, is one of the main parts of the north-south exchange corridor of Iran. The total length of Khorramabad-Poldokhtar axis is 48 km and the final lot, lot 4, in the area of Morani village to Poldokhtar city, with a length of 12 km, is the subject of this project.

Due to the special location of the project in the impassable mountainous areas of Lorestan province, the project includes the construction of 4 tunnels in the area of Morani and Babazeid villages, a tunnel in Poldokhtar district, and two special bridges.

Construction of 4000 meters length of protective wall in the vicinity of the route with the river is planned in order to protect the route against seasonal floods caused by the rising water level of Kashkan (Karkheh) river. And also in order to cross the intersection of the axis with Babazeid road, the construction of a bridge with ramps and loops is anticipated.

Renovation and improvement of damaged parts of the existing route, caused by devastating flood of the Kashkan River in the early spring of 2019, is one of the main parts of the project.

The main volumes of the project are as follows:

1- Excavation Work	550,000	Cub.m
2- Foundation Digging	15,000	Cub.m
3- Bedding	60,000	Sqr.m
4- Embankment	260,000	Cub.m
5- Tunnel Excavation	250,000	Cub.m
6- Anchor Rod	20,000	Meters
7- Pile	7,000	Meters
8- Stone Works	77,000	Cub.m
9- Form work	125,000	Sq.m
10- Rebar Tying	3,200	Ton
11- Steel	1,350	Ton
12- Concrete Pouring	75,000	Cub.m
13- Subbase and base	63,000	Cub.m
14- Prime Coat	130	Ton
15- Emulsion	50	Ton
16- Asphalt Binder	811,000	Sq.m-Cm
17- Asphalt Surface	579,000	Sq.m-Cm
18- Marking	37,000	Meters
19- Geotextiles	31,000	Sq.m
